Drawing for the Structural Analysis

1.1 Dynamic

1.1.1 \MassWithSpring command

This command draws a typical mass-spring system. It supports also an optional damper and displacement. The basic behavior of this command is shown in fig. 1.1.

Figure 1.1: Mass-Spring system

```
1 \begin{tikzpicture}[scale=1]
2   \MassWithSpring[]
3 \end{tikzpicture}
```

More interesting behaviours can be achieved using the optional key values, as shown in fig .

Figure 1.2: More complex mass-spring system

```

1 \begin{tikzpicture}[scale=1]
2   \MassWithSpring[displacement = 2em, with damper = true]
3   \MassWithSpring[displacement = -1em, with wall = false, position
4     = {10.5em,0em}]
5   \MassWithSpring[displacement = 3em, with wall = false, position =
6     {18.0em,0em}]
7 \end{tikzpicture}

```
